Anika Rao

Senior Software Developer

anika.rao@example.com | +1 512 555 0101
Austin, Texas, United States

PROFESSIONAL SUMMARY

Full-stack developer with eleven years of experience building workflow applications for logistics and professional services. Combines TypeScript and PostgreSQL expertise with pragmatic system design, accessible interfaces and disciplined release practices. Comfortable leading technical discovery, mentoring engineers and translating operational problems into maintainable software.

CORE SKILLS

TypeScript / JavaScript / React / Node.js / PostgreSQL / REST APIs / Docker / Git / Jest / Accessibility / System design / Agile delivery

PROFESSIONAL EXPERIENCE

Senior Software Developer | Cedarstack Workflow Labs

Apr 2022 - Present | Austin, Texas | Full-time

- Led a six-person team delivering a dispatch platform used by 180 fictional customer organizations and 2,400 daily users.
- Replaced synchronous invoice processing with a retryable job pipeline; reduced median document processing time from 14 minutes to 4 minutes.
- Designed tenant-scoped authorization and audit trails for 38 API endpoints, including automated negative-permission tests.
- Introduced code review checklists, observability dashboards and staged releases; lowered escaped production defects by 31%.

Software Developer | Bluefen Digital Services

Jul 2018 - Mar 2022 | Austin, Texas | Full-time

- Built React account-management screens and Node.js services for subscription billing and service scheduling.
- Tuned PostgreSQL indexes and pagination, reducing the slowest reporting query from 9.2 seconds to 1.4 seconds.
- Partnered with designers to improve keyboard navigation and screen-reader labels across 26 reusable components.
- Mentored two graduate developers and documented setup procedures that cut onboarding from ten days to six.

Junior Software Developer | Maplequay Applications

Aug 2015 - Jun 2018 | Dallas, Texas | Full-time

- Maintained customer portals, resolved support escalations and implemented REST integrations with inventory tools.
- Added unit and integration tests to a legacy service, raising meaningful branch coverage from 42% to 78%.
- Participated in sprint planning and prepared deployment notes for monthly releases.

Anika Rao

Senior Software Developer | Qualifications and selected work

EDUCATION

Bachelor of Science in Computer Science

Fictional Westbridge University

Aug 2011 - May 2015 | Grade: 3.7 / 4.0

PROJECTS

Dispatch Audit Console

Technical lead | Feb 2023 - Oct 2023

Designed searchable event timelines and exportable audit evidence. Delivered role-based views for dispatchers and compliance reviewers; reduced investigation preparation time by 45%.

Methods / tools: TypeScript, React, PostgreSQL

https://projects.example.com/anika-rao/project-1

Open Schedule Toolkit

Maintainer | Jun 2021 - Feb 2022

Created a synthetic open-source scheduling package with timezone-aware recurrence handling, 160 automated tests and migration documentation.

Methods / tools: Node.js, Jest, REST APIs

https://projects.example.com/anika-rao/project-2

CERTIFICATIONS

Cloud Developer Foundations

Fictional Cloud Skills Council

Issued: Jun 2023 | Expires: Jun 2026 | Credential ID: TEST-01-01

Accessible Web Practitioner

Fictional Inclusive Interfaces Institute

Issued: Mar 2024 | No expiry | Credential ID: TEST-01-02

LANGUAGES

English (Fluent) / Hindi (Native) / Spanish (Conversational)

PROFESSIONAL CONTRIBUTIONS

- Speaker, Fictional Austin Software Forum: practical authorization testing, April 2024.
- Volunteer mentor for a fictional community coding program; guided four learners through portfolio projects.
