PROFESSIONAL SUMMARY

Cybersecurity analyst with eight years of experience in security monitoring, incident triage and control assurance. Skilled at translating telemetry into actionable investigation steps and maintaining clear evidence records. Partners with infrastructure and application teams to prioritize realistic remediation work and strengthen response readiness.

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst | Asterveil Security Services

Apr 2022 - Present | Washington, District of Columbia | Full-time

- Monitored enterprise telemetry for 4,200 endpoints and triaged security alerts within agreed response windows.
- Developed 23 detection rules mapped to adversary techniques and reduced duplicate alert volume by 32%.
- Coordinated incident evidence collection, containment requests and retrospective action tracking.
- Improved critical vulnerability remediation compliance from 74% to 93% through owner-based reporting.

Security Operations Associate | Northquill Information Systems

Jan 2020 - Mar 2022 | Arlington, Virginia | Full-time

- Investigated phishing, suspicious authentication and endpoint alerts using log correlation and analyst playbooks.
- Wrote Python utilities to enrich indicators and standardize incident summaries.
- Supported quarterly access reviews and documented exception approvals for sensitive applications.
- Delivered security-awareness briefings tailored to service desk and finance staff.

IT Support Analyst | Elmspire Network Partners

Jun 2018 - Dec 2019 | Baltimore, Maryland | Full-time

- Resolved endpoint and access incidents, maintained device records and supported software patching.
- Escalated unusual account activity and documented troubleshooting steps for follow-up investigations.
- Helped deploy multifactor authentication to 620 staff accounts.

Leila Farouk

Cybersecurity Analyst | Qualifications and selected work

EDUCATION

Bachelor of Science in Cybersecurity

Fictional Capitol Birch University

Sep 2014 - May 2018 | Grade: 3.8 / 4.0

PROJECTS

Identity Alert Tuning

Detection analyst | Apr 2023 - Jan 2024

Correlated sign-in risk, device context and privilege changes to reduce false-positive authentication alerts by 41% in a synthetic validation dataset.

Methods / tools: SIEM, Python, Log analysis

https://projects.example.com/leila-farouk/project-1

Incident Tabletop Pack

Facilitator | May 2021 - Dec 2021

Prepared fictional ransomware and account-compromise exercises with inject cards, evidence checklists and a structured after-action report.

Methods / tools: Incident response, Risk assessment
