PROFESSIONAL SUMMARY

Quality assurance automation engineer with eight years of experience testing web applications and API-driven services. Designs reliable test coverage around business risk and maintains actionable release evidence. Experienced in Playwright, TypeScript and continuous integration, with strong collaboration across product and engineering.

PROFESSIONAL EXPERIENCE

QA Automation Engineer | Everquay Software Studio

Apr 2022 - Present | Portland, Oregon | Full-time

- Owned automation strategy for four business applications and a suite of 28 public API endpoints.
- Replaced brittle UI scripts with stable fixtures and semantic locators, reducing flaky failures from 18% to 3%.
- Integrated smoke and regression suites into delivery pipelines, shortening release verification from two days to four hours.
- Introduced risk-based test planning and improved release defect escape rate by 29%.

QA Engineer | Mossbridge Digital Services

Jan 2020 - Mar 2022 | Portland, Oregon | Full-time

- Created manual and automated tests for billing, permissions and scheduling workflows.
- Validated database changes with SQL queries and documented rollback test evidence.
- Collaborated with developers to investigate intermittent failures and isolate reproducible conditions.
- Prepared concise defect reports including expected behavior, actual behavior and minimal reproduction steps.

Junior Test Analyst | Fernpath Application Partners

Jun 2018 - Dec 2019 | Eugene, Oregon | Full-time

- Executed acceptance and regression tests for monthly releases and tracked results in shared test plans.
- Maintained representative synthetic test data for user roles and transaction scenarios.
- Assisted with accessibility checks and browser compatibility testing.

Lucas Romero

QA Automation Engineer | Qualifications and selected work

EDUCATION

Bachelor of Science in Computer Science

Fictional Cascade Rowan College

Sep 2014 - May 2018 | Grade: 3.6 / 4.0

PROJECTS

API Contract Test Suite

Automation lead | Mar 2023 - Nov 2023

Built contract checks for 28 endpoints, including authorization, pagination and malformed input cases; detected eleven compatibility issues before release.

Methods / tools: TypeScript, API testing, CI/CD

https://projects.example.com/lucas-romero/project-1

Synthetic Test Data Factory

Engineer | Feb 2021 - Sep 2021

Created deterministic account and transaction fixtures with explicit cleanup, reducing environment setup effort by 60%.

Methods / tools: SQL, Test automation

https://projects.example.com/lucas-romero/project-2

CERTIFICATIONS

Software Quality Practice

Fictional Testing Credentials Board

Issued: Jan 2023 | No expiry | Credential ID: TEST-18-01

Modern Web Test Automation

Fictional Quality Engineering Academy

Issued: Jun 2024 | No expiry | Credential ID: TEST-18-02

PROFESSIONAL CONTRIBUTIONS

- Maintain an internal guide for diagnosing flaky tests and reducing nondeterministic dependencies.
- Mentor junior analysts in writing clear, reproducible defect reports.
